

**WorldCat Local** is the latest thing from our friends at OCLC. Holman Library is pleased to offer this cutting edge service to the McKendree community.

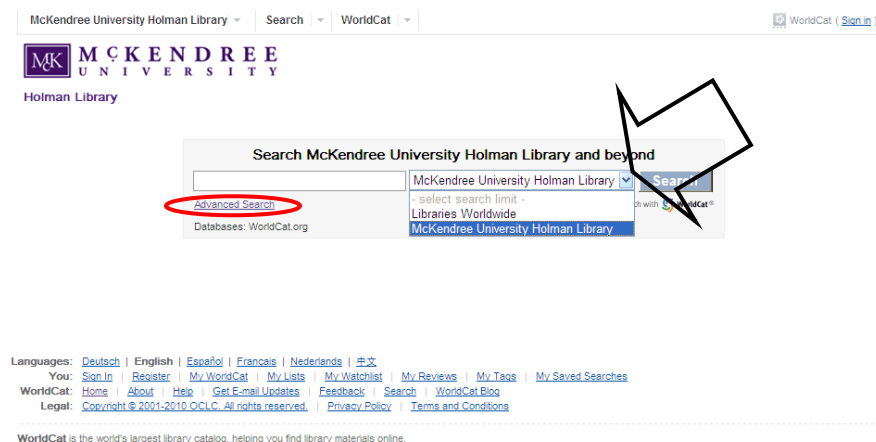

What does it do? You already know OCLC as the connection between the world's libraries and for their fine FirstSearch databases. **WorldCat Local** connects different systems in order to provide a more integrated experience for users. You'll be thrilled about the quality of the new searching interface and all of the quality data now available in one search.

It's as easy to use as A, B, C...

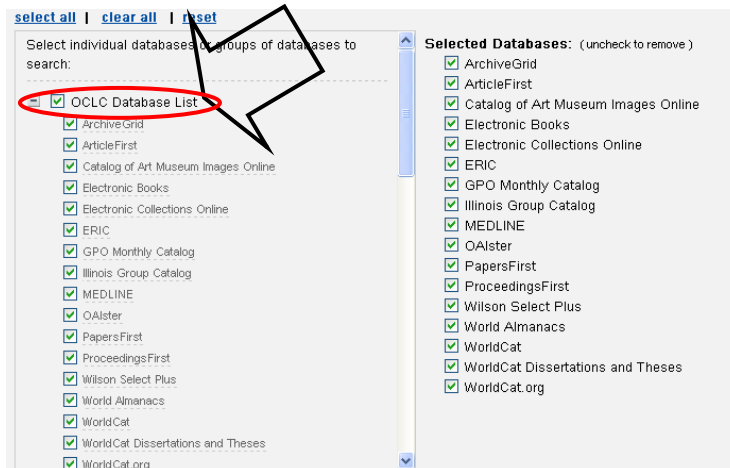

**A)** Select **WorldCat Local** from the Library's [homepage](#).

**B)** Once you're at [WorldCat Local](#), you may choose between searching only Holman Library or searching worldwide. The Advanced Search feature provides even more options.

**C)** The Advanced Search allows you to include one or all of the FirstSearch databases when searching, as well. Books, documents and journal articles are available in one single search.

Stay out of the heat, Bearcats!  
Bill
